To Whom It May Concern,

I am writing to express my interest in opportunities within your organisation where I can apply my background in data science, informatics, and health information systems. I hold a Bachelor of Science Honours Degree in Data Science and Informatics from Midlands State University (Degree Class 2.1), and I bring hands-on experience turning data into practical tools that support real decision-making.

During my industrial attachment at Chinhoyi Provincial Hospital, I managed patient health records across clinical departments and designed a Pharmaceutical Inventory Tracking System that gave the pharmacy real-time visibility of stock, with automated alerts for stockouts and expiring items. Outside of the workplace, I have built and shipped several independent projects, including ZSEPulse, an AI-assisted dashboard for the Zimbabwe Stock Exchange that generates trading signals with 84% 30-day accuracy, and HiveFund, a digital savings-club platform that placed 3rd at the Econet Hackathon 2025. I am also an active Zindi Ambassador for Zimbabwe, representing the local data science community within a continent-wide competitive machine learning platform.

I am comfortable working across the full data pipeline, from cleaning and validating datasets to building predictive models (Python, XGBoost, LightGBM, scikit-learn) and deploying them in full-stack applications (Flutter, Flask, Django). I take particular care with data privacy and confidentiality, a habit built through direct work with sensitive patient records. I am a quick learner, reliable under deadlines, and enjoy collaborating with multidisciplinary teams to deliver solutions that are actually used, not just built.

I would welcome the opportunity to discuss how my skills could contribute to your team. My CV, academic transcript, and certificates are attached for your reference, and I am available at your convenience for an interview.

Thank you for your time and consideration.

Yours faithfully,

Vimbainashe Mandaza
